

2021

What follows is a peek inside an identity held by an intermediary and served daily for a unique consumer for the second quarter of 2021.

Dear Virgo, Life is finally starting to resemble the Aesop fable your ancestors told you about “The Boy Who Cried Wolf”. But in order to protect yourself from your own illusory squeamishness, you’ll have to be extra careful about the way you wield your knife. If you think about it too hard, you’ll start crying, too.

It’s a good thing that a young relative of yours got cured of their miserableness by taking a tour of your office.

Here's a story.

She met you in the elevator and was very excited about all your plants.

Bad news and questions surrounding love are on the horoscope for June.

“Like life, there’s good news and bad news in your June 2021 horoscope.

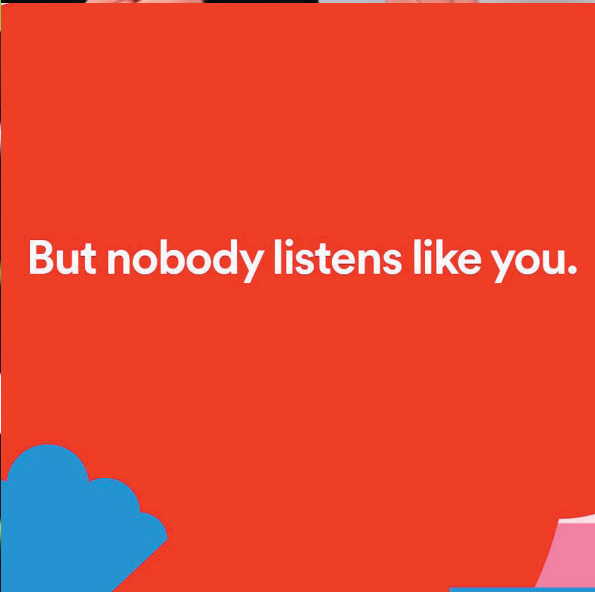

The good news: you may have the urge to walk off a cliff, literally or figuratively, and take your partner up on their sexual demands. Maybe it’s time to revisit your fantasies.

The bad news: If you do that, you might die or have a brain aneurysm! Get it? June is full of great sex and confusion.”
